

BROMAKIL BLOCK BAIT FOR RATS AND MICE

DIRECTIONS FOR USE

RESTRAINTS

DO NOT exceed 3m between bait stations for mice, or 9m for rats.
DO NOT place baits in open.

SITUATION	PEST	RATE	CRITICAL COMMENTS
In and around Industrial, Commercial, Agricultural and Domestic situations. Apply where pests occur, eg. food processing factories, or stores, laundries, restaurants, ships, boiler houses, hotels and motels, sub-floors, roof voids and wall cavities.	Rats	3 or more 20 gram blocks per bait station	Place edible items which cannot be moved in rodent-proof containers. Sweep up all edible waste. Protect baits from water where possible.
	Mice	3 or more 20 gram blocks per infested area	BAITING STRATEGY: Eliminate as far as practicable, all alternative food sources. Bait infested area. Place baits under cover. Inspect baits daily. Replace eaten baits. If eaten quickly increase number of baits. Continue observation and replenishment until no more baits are taken. Baiting for at least 2 weeks is necessary to reduce rat/mouse numbers.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

The use of this product for the control of protected native rodents requires permission from wildlife authorities.

MANUFACTURER’S WARRANTY AND EXCLUSION OF LIABILITY

This product as supplied is of a high grade and believed to be suitable for any purpose for which it is expressly recommended and must be used in accordance with the Directions for Use given on the label. No responsibility is accepted in respect of the product save those non-excludable conditions implied by any Federal and State legislation or law of a Territory.

GENERAL INSTRUCTIONS

Bromakil Blocks are particularly useful in areas where baits deteriorate rapidly, such as damp areas, sub-floors, roof voids and wall cavities. The hole in the centre of the block will allow pinning or tying off the ground in very moist areas, or where rodents are climbing. The blocks may be used in conjunction with grain bait treatments.

PRECAUTION: DO NOT allow bait to contaminate foodstuffs or food intended for human or animal consumption. Do not apply bait to crops.

Place baits in locations or bait stations which are inaccessible to other animals and birds. This product is hazardous to pigs, cats, dogs, native wildlife and poultry.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT: DO NOT contaminate streams, rivers, or waterways with the chemical or used containers. Place baits in locations inaccessible to animals other than target animals.

STORAGE AND DISPOSAL: Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight.

If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers and product.

Dispose of carcasses safely by burning or burying in an approved landfill.

SAFETY DIRECTIONS: Poisonous if absorbed by skin contact or swallowed. Repeated minor exposure may have a cumulative poisoning effect. Avoid contact with skin. When preparing product for use wear elbow-length PVC gloves. If on skin and after each baiting, wash thoroughly with soap and water. After each day’s use, wash gloves.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone 13 11 26. Vitamin K1 (PHYTOMENADIONE) is antidotal.

MATERIAL SAFETY DATA SHEET: Additional information is listed on the Material Safety Data Sheet available from the supplier.
