

GENERATION®

BLUE SOFT BAIT

THINK SOFT. STRIKE HARD!

The latest generation anti-coagulant in an irresistible soft bait formulation that gets rapid results from a single feed. Rats are intelligent and selective feeders. They are very cautious around new feed sources, sensitive to chemicals and can quickly become bait shy. Liphatech have come up with an outstanding new product with the latest new active ingredient in the most palatable soft bait ever developed.

KEY FEATURES:

- ✓ 10g ready-to-use soft bait, unique formulation.
 - Superior attractiveness and palatability. More attractive than competing food sources.
 - Special soft bait paper allows aroma to escape and attract rodents.
 - Excellent texture, no leaking, no melting.
 - Very good heat tolerance. Good moisture tolerance.
- ✓ Active ingredient, difethialone 25ppm which is not detected by rodents.
- ✓ The most advanced and highly effective anti coagulant with no known genetic resistance among rodent populations.
- ✓ The smallest non-dispersible bait on the market.
- ✓ Single-feed with rapid mode of action.
 - 2-3g to kill a mature rat (average daily diet = 20g/day)
 - 0.3-0.4g to kill a mouse (average daily diet = 3g/day)

Overnight Consumption Pig Farm

Pests: Roof rats
Head to head trial against 5 leading brands.
Competing food was readily available.
Results are typical of other studies

WHEN:

Ideal for heavy rat infestations and lingering rodents.
Ideal mice product even in highly competitive food environment

TARGETED USE:

1. Thorough inspection around farm buildings (look for faeces, gnawing etc.)
2. Remove rubbish, clutter, food sources (spilled grain) and vegetation to reduce harbourage
3. Locate trouble spots and high activity areas
4. Use like a mini-block. Customize the dose to the rodent pressure. Place bait stations in rodent pathways and where they are easily found. Inspect regularly to determine if enough baits have been placed and keep up a fresh supply. Bait inside and outside buildings
5. Record and map rodent activity and trapping. Reinfestation is common and treating a new population in an old habitat may be required.

Pack Sizes Soft Bait 480g, 1.5kg and 5.5kg
