Specifications

PACK SIZE

20 KG

SHELF LIFE OF THE PRODUCT

24 months

FORM

Micro granules

STORAGE CONDITIONS

Store away from humidity.

FORMULATION

Micro granules

APPLICATION

Soil

DENSITY

0.85 +/- 0,05

Agronomic interests

ROLE OF NUTRIENT(S)

AGROSPEED MULTI associates Nitrogen and Phosphorus and micro-nutrients under perfectly assimilable forms. This mineral balance acts directly on the growth and the vegetative development.

Hardly mobile in the soil, Phosphorus is difficult to access by the roots of the seedling. The close placement of P to the roots greatly increases the uptake.

PRODUCT SPECIFICATIONS

Uniform micro granules provide multiple contact points with the seed providing emerging seedlings with vital nutrition elements for an optimum start.

AgroSpeed Multi is a essential part of the new season fertiliser program. It improves the efficiency of fertiliser use, and limits leaching losses improving yield

AgroSpeed MULTI is specially designed to be used with all micro granule application equipment currently set up on seeders. It offers extremely accurate fertiliser placement at the time of planting.

AgroSpeed MULTI allows to reduce the quantities of fertiliser used and simplifies logistics

FEATURES AND BENEFITS OF THE FORMULATION

The specific formulation of this product guarantees a very strong assimilation of the nutrition elements by the soil solution guaranteeing a better availability for the roots.

This product is formulated with rigorously selected raw materials, guaranteed by quality control, to ensure a perfect safety of use and to optimize the absorption through the soil.

Directions of use

CROP RECOMMENDATIONS

> **MAIZE, VEGETABLES AND OTHER CROPS** - Rate: 20-30 kg - Timing: placement in the furrow with the seeds. Applied with micro granule applicator.

> **COTTON, WHEAT, BARLEY AND OTHER CEREALS** - Rate: 20 kg - Timing: placement in the furrow with the seeds. Applied with micro granule applicator.

> **SOYBEAN** - Rate: 10 kg/ha. Comments : for 1-meter row spacing and above. For narrower spacings higher rates can be used to a maximum of 20 kg/ha : please discuss with your agronomist first - Timing: placement in the furrow with the seeds. Applied with micro granule applicator.

> **FORAGE BRASSICAS** - Rate: 20-30 kg

> **FODDER BEET** - Rate: 30 kg

> **PASTURES / LUCERNE / FESCUE / RYEGRASS / CLOVER** - Rate: 20 kg

Timing: placement in the furrow with the seeds. Applied with micro granule equipment or mixed with seeds (with conventional drills). When mixing with seeds, thoroughly mix the micro granules with the seeds. Sow about 3 to 4 hectares at most to avoid separation of the mix.

DO NOT APPLY ON FRENCH BEANS (*Phaseolus vulgaris*) CARROTS (*Daucus carota*).

Instructions for use

Make sure equipment used is calibrated, apply the correct amount of product. Take atmospheric conditions into consideration, such as humidity etc affecting flow. Empty microgranule boxes after use.

Precautions

IMPORTANT: respect the uses, doses, conditions and instructions for use mentioned on the packaging, which are determined according to the characteristics of the product and the applications for which it is recommended. On this basis, conduct the crop and treatments according to the best agricultural practices taking into account, under your responsibility, all the specific factors concerning your farm, such as soil characteristics, weather conditions, cropping methods, cultivars and their specific resistances. AGRONUTRITION guarantees the quality its products only in their initial packaging over the period indicated on the manufacturer's certificates. They guarantee their conformity to the composition indicated on the packaging and to the regulations currently in force. Precautionary measure brochures are available on request.
